GONE TO NEW YORK

The President Left This Morning, to Return Next Monday.

THOSE WHO ACCOMPANIED

NATURAL WOOD FLOORS Secretary Root Departs on a Flying Trip to Cuba

TO CONFER WITH WOOD

President and Mrs. McKinley left Washington at 11 o'clock this morning for New York, where they will remain until Monday morning. They took the special car Oceanic, attached to the regular Pennsylvania railroad train. With the President and his wife were Adjutant General Corbin, Miss Duncan, Dr. P. M. Rixey, Assistant Secretary Cortelyou and B. F. Barnes, executive clerk. In New York the party will stop at the Manhattan Hotel. The President will speak tomorrow night be-fore the Ohio Society of New York at a banquet at the Waldorf-Astoria Hotel. Although the exact time of returning to this city has not been fixed, it is probable that the party will leave New York at midnight Sunday, reaching here early Monday morning.

Secretaries Hitchcock and Wilson and a number of friends were at the depot to see the party off.

Secretary Root's Departure. Secretary Root also left Washington this morning, departing for a flying trip to Cuba. With him were Mrs. Root, Miss Root, Edward Root, his son; Col. Carter, assistant adjutant general; Private Secre-tary Coursey and Maj. Arthur Brooks. The

assistant adjutant general; Private Secretary Coursey and Maj. Arthur Brooks. The party had the special car Coronet over the Southern railway, leaving at 11:15 a.m. It is expected that the trip will occupy fully two weeks, allowing for a week's tour around the Island of Cuba. The army transport Sedswick is on her way to Tampa, and the party will embark on her at that point tomorrow for Havana.

Secretary Root saw the President at the station just before the chief executive left for New York.

It is known that the main object of the trip is to enable Secretary Root to confer personally with Gen. Wood, and as the latter will accompany the Secretary on his tour around the island there will be ample opportunities for such conferences. It is gathered from rather urgent communications that have been received here from Havana that, notwithstanding the apparent serently of conditions in Havana and Cuba generally, Gen. Wood has reason to feel grave apprehensions as to the future; not alone because of the possibility of outbreaks, but rather owing to the extreme gravity of important questions that are pressing from all sides for immediate decision. Secretary Root believes that he will be better fitted when actually on the ground to give Gen. Wood the benefit of his counsel; hence the present trip. present trip.

He points out that this is the though Austria has no protective tariff except on a very few articles cigars and tobacco, for instance, the traffic in which is a government monopoly. Some of the combinations noted in the report are among the hat makers, paper factories, sugar makers, shoe factories, knit goods and gas plants. While all are not trusts as the word is understood in the United States, yet, says the consul, their object is the same—to increase profits by advancing prices or reducing expenses of production

BIG STRIKE BEGINS

All the Union Machinists in Chicago Ordered Out.

OTHER TRADES MAY BE AFFECTED

Trouble May Even Spread to the Business in Canada.

COLUMBUS MENOUT, TOO

CHICAGO, Match 2.-War is now on be tween the International Association of Machinists and the Chicago Association of Machinery Manufacturers. As a result of the failure to reach an agreement between representatives of the two bodies to discuss the questions in dispute, the executive committee of the machinists' association decided to call a general strike of machinists in Chicago, and by night, it is expected that practically every union and many non-union machinists in this city will have laid down his tools, the only exceptions being at the shops which have already signed the agreement.

Question of Sympathetic Strike. The strike may take on a much wider range than at first anticipated. A meeting range than at first anticipated. A meeting of the executive committee of all the metal working organizations in the city was held today, and the question of a sympathetic strike discussed. It is understood the sentiment among the men strongly fawors such action in case it is found necessary to help the machinists win their fight. Members of the executive council of the International Association of Machinists were also started for other cities to investigate the prevailing conditions, and, if necessary, call out the machinists. No strike, however, has been as yet reported outside of Chicago, except in Columbus, Ohio, where, according to a telegram received this morning by President James O'Connell, every union man has quit work in obedience to orders from the union.

Life and Death Struggle.

Life and Death Struggle. President O'Connell said today that the trouble had now developed into a life and death struggle for the union, and that there were possibilities of the strike extending to all the metalworking organizations in the country, which would affect nearly 500,000 men. The machinists in Canada are also under control of the international association, and the strike, according to President O'Conneil may also be ordered in that territory

itory.

At present no trouble is anticipated be-

At present no trouble is anticipated between the union machinists and the various railroads terminating in Chicago, as on many of the lines grievances have already been settled.

The meeting of the representatives of the metalyorking organizations, called to decide the question of a sympathetic strike, took on a broader scope than at first expected. It was practically a meeting of the business of the Material Trades Council, which includes the unions in every line of metalworkers in Chicago. The meeting resulted in a decision on the part of the union representatives to support the machinists in all respects and to order sympathetic strikes at once wherever that action was found necessary. This may involve nearly 50,000 men in this city alone. The business agents expressed themselves as confident that their action would be followed by the material trades councils in other cities.
